PROFESSIONAL SUMMARY

Recent Computer Science & Artificial Intelligence graduate - Graduated 2026 (2022-2026) - specializing in Flutter and Dart, with 2+ years of hands-on practical experience building 9+ cross-platform mobile applications for iOS and Android. Experienced as a Flutter Developer Intern at Huma Volve, mastering Clean Architecture, State Management, Deep Linking, RESTful APIs, and Offline-first capabilities. Proficient in Firebase, BLoC, Cubit, Provider, and SOLID principles. Comfortable managing multiple projects in parallel and delivering readable, testable, production-quality code. Seeking an entry-level Flutter Developer role to grow within a professional engineering team.

EXPERIENCE

Flutter Developer Intern — Huma Volve

Jul 2026 – Aug 2026

- Completed an intensive Flutter Software Engineering internship focused on building production-ready mobile applications.
- Mastered core engineering concepts including Object-Oriented Programming (OOP), Dart, Flutter, and SOLID principles.
- Implemented scalable architectures using Clean Architecture alongside advanced State Management patterns.
- Integrated RESTful APIs for dynamic data fetching, response handling, and backend synchronization.
- Implemented Offline Mode capabilities for robust data persistence and a smooth user experience without network connection.
- Configured Deep Linking to seamlessly route users from external links into specific application screens.
- Developed and delivered a complete real-world production project, collaborating on code reviews, architecture setup, and feature delivery.

Flutter Developer — Personal & Academic Projects

2022 – Present

- Designed and built 9+ cross-platform mobile applications using Flutter & Dart for iOS and Android (2+ years of hands-on practical experience).
- Built an AI-powered job recruitment app with real-time chat (SignalR), push notifications (OneSignal), and 10+ screens.
- Applied Clean Architecture and Dependency Injection (GetIt, Injectable) across multiple projects.
- Integrated Firebase Auth, Cloud Firestore, and Cloud Storage with secure session management.
- Managed application state using BLoC, Cubit, and Provider for predictable, testable UI behavior.

EDUCATION

BSc in Computer Science and Artificial Intelligence

2022 – 2026

Faculty of Computers and Artificial Intelligence, Beni Suef University

Cumulative Grade: Very Good | **Graduation Project Grade:** Excellent (A+)

Relevant Coursework: Data Structures, Algorithms, OOP, Software Engineering, Artificial Intelligence

KEY PROJECTS

01. DevJob AI Recruitment Platform (Graduation Project - Grade: A+) [Flutter](#) [BLoC](#) [REST API](#) [SignalR](#) [OneSignal](#)

AI-powered recruitment platform matching job seekers with employers. Real-time chat via SignalR; push notifications via OneSignal & Local Notifications; resume upload via File Picker across 10+ screens.

02. E-Commerce Mobile Application [Flutter](#) [BLoC](#) [Clean Architecture](#) [GetIt](#) [Dartz](#)

Full-featured shopping app with product browsing, category filtering, and a dynamic cart. Clean Architecture with DI; functional error handling via Dartz (Either); local persistence with Shared Preferences.

03. Fruit Market App [Flutter](#) [BLoC](#) [Firebase Auth](#) [Cloud Firestore](#)

Fruit marketplace with secure Firebase Auth login, real-time Firestore sync, category browsing, and a dynamic cart system built on Clean Architecture.

04. Cash Track Budget & Expense Tracker [Flutter](#) [BLoC](#) [FL Chart](#) [REST API](#)

Personal finance tracker with interactive charts, real-time budget progress indicators, and multi-currency REST API integration.

05. Recipe App (Recipy_App) [Flutter](#) [REST API](#) [BLoC](#) [Cached Network Image](#)

Food recipe browsing app with ingredient guides, step-by-step cooking instructions, and locally cached favorites for offline access.

06. Islami App [Flutter](#) [BLoC](#) [Just Audio](#) [Localization](#)

Quran, Hadith, Azkar, and Sebha app with a full audio player and background playback support.

07. News Reader App [Flutter](#) [BLoC](#) [REST API](#) [WebView](#)

Multi-category live news reader aggregating Sports, Politics, Health, Business, Science & Environment via REST API, with in-app WebView reading and external sharing.

08. Revisio - Quiz & Exam App [Flutter](#) [BLoC/Provider](#) [Firebase](#)

Interactive assessment and exam-revision app for student learning, with question banks, scoring, and progress tracking.

09. To-Do & Task Management App [Flutter](#) [Provider](#) [Firebase](#) [Table Calendar](#)

Full CRUD task management with Firebase push notifications, local reminders, and an interactive calendar view. Swipe-to-delete/complete gestures with Arabic/English multi-language support.

TECHNICAL SKILLS

Mobile Development	Flutter, Dart - iOS & Android cross-platform apps
State Management	BLoC, Cubit, Provider
Architecture	Clean Architecture, OOP, SOLID, Dependency Injection (GetIt, Injectable), Offline-First
Backend & APIs	RESTful APIs, Dio, HTTP, JSON, Firebase (Auth, Firestore, Storage)
Advanced Features	Deep Linking, Local Persistence, Real-Time (SignalR), Push Notifications (OneSignal, Local Notifications)
Tools & UI/UX	Animations, Shimmer, Cached Network Image, GoRouter, WebView, Git, GitHub, VS Code

TRAINING & COURSES

Flutter Complete Course — Udemy (Tharwat Samy)	2023 – 2024
Clean Architecture in Flutter — Route Training Center	2024
Flutter Full Course — YouTube (Wael Abu Hamza)	2023

LANGUAGES

Arabic: Native | English: Professional
