PROFESSIONAL SUMMARY

Recent Computer Science & Artificial Intelligence graduate specializing in Flutter and Dart, with hands-on experience building 7+ cross-platform mobile applications for iOS and Android. Experienced as a Flutter Developer Intern at Huma Volve, mastering Clean Architecture, State Management, Deep Linking, RESTful APIs, and Offline-first capabilities. Proficient in Firebase, BLoC, Cubit, Provider, and SOLID principles. Comfortable managing multiple projects in parallel and delivering readable, testable, production-quality code. Seeking an entry-level Flutter Developer role to grow within a professional engineering team.

EXPERIENCE

Flutter Developer Intern – Huma Volve

Jul 2026 – Aug 2026

- Completed an intensive Flutter Software Engineering Internship focused on building production-ready mobile applications.
- Mastered core engineering concepts including Object-Oriented Programming (OOP), Dart, Flutter, and SOLID Principles.
- Implemented scalable architectures using Clean Architecture alongside advanced State Management patterns.
- Integrated RESTful APIs for dynamic data fetching, response handling, and backend synchronization.
- Implemented Offline Mode capabilities to enable robust data persistence and smooth user experience without network connection.
- Configured Deep Linking to seamlessly route users from external links into specific application screens.
- Developed and delivered a complete real-world production project, collaborating on code reviews, architecture setup, and feature delivery.

Flutter Developer – Personal & Academic Projects

2022 – Present

- Designed and built 7+ cross-platform mobile applications using Flutter & Dart for iOS and Android.
- Built an AI-powered job recruitment app with real-time chat (SignalR), push notifications (OneSignal), and 10+ screens.
- Applied Clean Architecture and Dependency Injection (GetIt, Injectable) across multiple projects.
- Integrated Firebase Auth, Cloud Firestore, and Cloud Storage with secure session management.
- Managed application state using BLoC, Cubit, and Provider for predictable, testable UI behavior.

EDUCATION

BSc in Computer Science and Artificial Intelligence

2022 – 2026

Faculty of Computers and Artificial Intelligence, Beni Suef University

Relevant Coursework: Data Structures, Algorithms, OOP, Software Engineering, Artificial Intelligence

KEY PROJECTS

Job Matching & AI-Driven Recruitment Platform | Flutter, BLoC, REST API, GoRouter, SignalR, OneSignal

- Cross-platform app connecting job seekers with employers via AI-powered matching.
- Real-time chat via SignalR; push notifications via OneSignal and Flutter Local Notifications.
- Clean navigation with GoRouter across 10+ screens; resume upload via File Picker; Dio & HTTP for networking.

E-Commerce Mobile Application | Flutter, BLoC, Dartz, Injectable, GetIt, HTTP

- Full-featured shopping app with product browsing, category filtering, and a dynamic cart system.
- Clean Architecture with Dependency Injection; functional error handling using Dartz (Either pattern).
- Carousel slider, staggered animations, connectivity awareness, and local persistence with Shared Preferences.

News App – Multi-Category News Reader | Flutter, BLoC, HTTP, WebView, Cached Network Image

- Aggregates live news across Sports, Politics, Health, Business, Science, and Environment via REST API.
- In-app article reading via WebView Flutter, with external sharing through URL Launcher.

To-Do & Task Management App | Flutter, Provider, Firebase, Table Calendar, Flutter Slidable

- Full CRUD task management with Firebase push notifications, local reminders, and an interactive calendar view.

- Swipe-to-delete/complete gestures with Arabic/English multi-language support.

Budget & Expense Tracker App | *Flutter, BLoC, FL Chart, Percent Indicator, HTTP*

- Personal finance tracker with interactive charts, real-time budget progress, and REST API integration.

Fruit Market App | *Flutter, BLoC, Firebase Auth, Cloud Firestore, Clean Architecture*

- Fruit marketplace with secure Firebase Auth login, real-time Firestore sync, and a dynamic cart system.

Islami App – Islamic Content & Audio Player | *Flutter, BLoC, Just Audio, Audio Session, Localization*

- Quran, Hadith, Azkar, and Sebha with a full audio player and background playback support.

TECHNICAL SKILLS

Mobile Development:	Flutter, Dart – iOS & Android cross-platform apps
Architecture & Paradigms:	Clean Architecture, OOP, SOLID, Dependency Injection (GetIt, Injectable), Offline-First Architecture
State Management:	BLoC, Cubit, Provider
Backend & APIs:	RESTful APIs, Dio, HTTP, JSON, Firebase (Auth, Firestore, Storage)
Advanced Features:	Deep Linking, Local Persistence, Real-Time (SignalR), Push Notifications (OneSignal, Local Notifications)
UI/UX & Tools:	Animations, Shimmer, Cached Network Image, GoRouter, WebView, Git, GitHub, VS Code

TRAINING & COURSES

- **Flutter Complete Course** – Udemy (Tharwat Samy), 2023–2024: State management, Firebase, REST APIs, advanced UI
- **Clean Architecture in Flutter** – Route Training Center, 2024: Clean Architecture, SOLID, Dependency Injection
- **Flutter Full Course** – YouTube (Wael Abu Hamza), 2023: BLoC, Provider, Firebase integration

LANGUAGES

Arabic: Native | **English:** Professional
